

## Operations Research Analysts

We seek several talented **Operations Research Analysts** to join the **Volpe Center's** world-class technical teams in providing a wide range of technical products and services to enhance the safety, security and operation of national traffic management systems, information, and programs. In this role, you will analyze and evaluate organizational processes, systems, and data; develop support tools; and participate in technical teams conducting applied research studies to meet the requirements of our clients including the Department of Defense and the Federal Aviation Administration among others.

If you have strong research and analytical skills in a scientific or technical field, and enjoy solving challenging technical problems in a collaborative and entrepreneurial environment, you will enjoy working with us!

We have several openings in the following Centers of Innovation (COI's):

**Safety Management Systems:** This COI anticipates and responds to challenges in safety management for all modes of transportation, addressing highly complex safety requirements.

**Communication, Navigation, Surveillance, and Traffic Management Systems:** This COI maintains and applies internationally recognized capabilities in communication, navigation, surveillance, operations management, and associated IT disciplines to enhance the capacity, safety, and security of next-generation transportation systems.

**To apply:** visit USAjobs <http://jobview.usajobs.gov/GetJob.aspx?JobID=88735995> to complete the online application. **Application deadline: September 13, 2010.** The first application review date will be June 24, 2010. Thereafter, we will review applications each month with the final review occurring after the application deadline. **Salary range:** \$62,758- \$97,787 per year. **Transcripts are required** (see "How to Apply" tab of the USAjobs announcement for submittal instructions). **Questions?** Contact Elizabeth León at 617-494-2214 or [elizabeth.leon@dot.gov](mailto:elizabeth.leon@dot.gov).

**Located in Cambridge, MA, Kendall Square** (<http://www.kendallsquare.org/>), the **Volpe National Transportation Systems Center (Volpe Center)** is part of the **U.S. Department of Transportation (DOT)** Research and Innovative Technology Administration (RITA). We're an innovative, federal, fee-for service organization whose mission is to improve the Nation's transportation system. Our work is performed primarily for DOT agencies; however sponsors include other federal agencies and state, local, and international entities. When you work at the Volpe Center you work with people like you – talented professionals who enjoy putting their expertise to work in the service of others and resolving real-world transportation problems. We offer competitive benefits, and a flexible and family-friendly work environment.
