

# Car Sharing in Planned Communities

S. Maurice Rached, PE, PTOE

2016 Transportation  
Technology Summit:  
Innovative Mobility  
Solutions

# Transit Oriented Developments (TOD)

- 
- Density and parking are among the biggest challenges facing TODs & Planned Communities
  - Most parking requirements are not TODfriendly
  - Meeting certain parking requirements encourages high vehicle ownership rates
  - Complying with some local & State requirements defeats the intent and purpose of smart growth
  - Developers are shying away from TOD projects

# Case Study – Residential Development

- 
- Prior Gas Station site in New Jersey
  - Site currently under-utilized and dilapidated
  - Site has been vacant for many years
  - In a very desirable area and near train station
  - 60 units needed to make the project viable
  - Parking requirements dictate about 120 spaces
  - Challenge: parking/access/automobile ownership

# CarSharing – The Solution

- 
- One car shared by many
  - Fully automated system
  - Technology based on Internet, wireless, and GPS
  - Once subscribed, reserving a vehicle is done in seconds
  - Provider pays for gas, tolls, insurance, maintenance, car washing....
  - Virtual concierge system

# CarSharing – How it Works

- Reserve on-line or by phone
- Data is wirelessly transmitted to the vehicle
- The technology logs the vehicle usage and vital driver and vehicle information.

# CarSharing - History

- 
- CarSharing programs launched successfully in Europe in the mid-1980s
  - In North America, car sharing began in the 1990s
  - Zipcar has 767,000 members and 11,000 vehicles, Car2Go has 900,000 members and 12,000 cars.
  - About 18 non-profit and for-profit operations in 30 states, over 150 college campuses, and many commercial businesses

# CarSharing - Benefits

**Studies have shown 1 CarShare vehicle:**

- Removes up to 31 private vehicles off the road
  - Eliminates the need for up to 30 parking spaces
- 71% of CarShare members avoid purchasing a second vehicle**

**We all share the  
same vehicle . . .**

# CarSharing – Age Distribution

# Y Generation Survey

If there were more options in my area such as public transportation, car sharing or convenient carpooling, I would drive less than I do now.

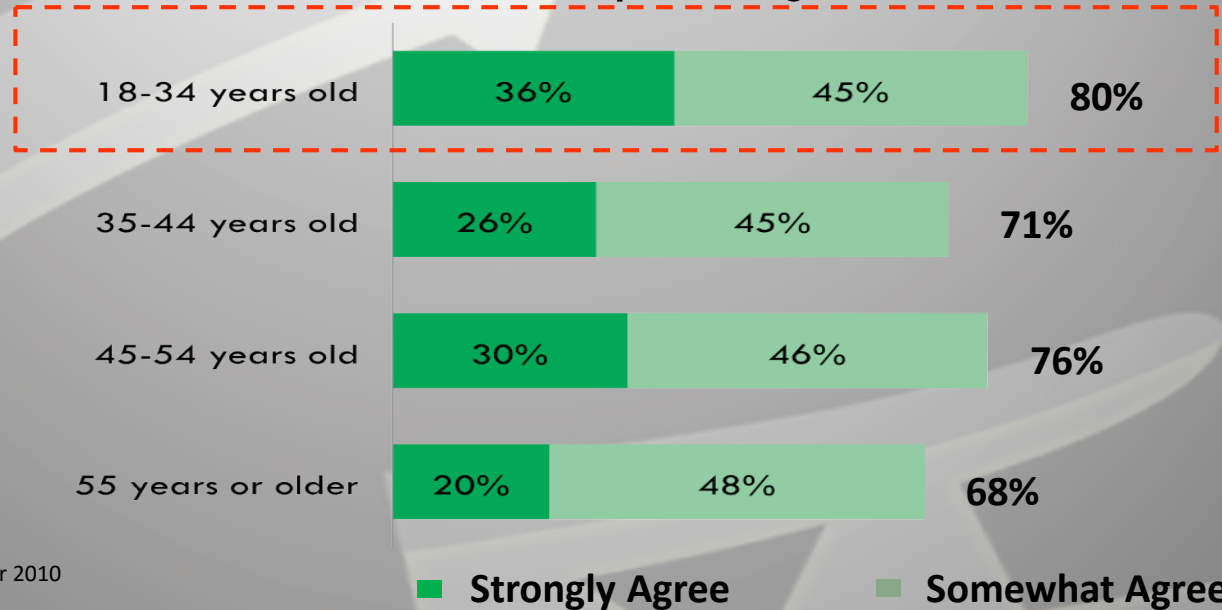

- Online survey of 1,025 adults
- Ages 18 and over
- 966 licensed driver
- Conducted October 2010

Sources: Zipcar Millennial Survey October 2010

# Survey Findings

In today's economy, it can be difficult to own a car because of the high cost of gas, insurance, maintenance and parking.

# The Red Bank Project

- 2 CarSharing vehicles
- 1 space per unit, 4 spaces for visitors
- Parking reduced by about 55 spaces
- Cool Project Concept: Bicycles, solar energy, virtual concierge...

# Virtual Concierge

Integrating transportation  
with other needs/services

- Transportation needs
  - Car/Mass Transit/Air
- Personal schedule
- Personal services
- Home control
- Entertainment & food

# Questions

- 
- How many Parking Credits per shared car?
  - What are the characteristics of a suitable location?
  - Will the cars be available to the general community?
  - How is the system managed?
  - How much does it cost?
  - How about electric cars?
  - How is the virtual concierge paid for?
